NOTES TO THE FINANCIAL STATEMENTS AT 31 DECEMBER, 1991

1. ACCOUNTING POLICIES

The financial statements have been prepared on the historical cost basis, adjusted by the revaluation of certain fixed assets. The principal accounting policies adopted and applied, on a basis consistent with the previous financial year are as follows:

1.1 Bad and Doubtful Debts

Advances are stated after deduction of specific provisions against bad and doubtful debts and after deducting such interest on advances which is not taken to revenue because recovery is doubtful.

1.2 Premises and Equipment

Freehold land and buildings are included in the accounts at historical cost or subsequent valuation as set out in note 5. Land is not depreciated. Freehold buildings are maintained in a good state of repair and it is considered that the residual values are such that any depreciation is not significant. Accordingly no depreciation has been charged on buildings.

Equipment, including fixed plant in buildings, is depreciated on a straight line basis at rates considered appropriate to write off the assets over their anticipated economic lives, principally between 5 and 10 years.

1.3 Assets under lease

Leasing contracts are regarded as financing transactions and the total rental instalments receivable thereunder, less unearned finance charges, are included in advances and other accounts in the balance sheet.

Income from leases is taken to revenue over the period of the lease in proportion to the capital balance outstanding.

1.4 Exchange rates

Assets and liabilities in foreign currencies are translated at the rates of exchange ruling at the financial year end or, where applicable, at forward cover contract rates.

1.5 Deferred Taxation

Account is taken, on the liability basis, for the tax effects arising from all timing differences in the accounting and taxation treatment of leasing income, depreciation of fixed assets and specific bad and doubtful debt provisions.

1.6 Retirement benefits

The Standard Chartered Bank Swaziland Pension Fund, which is a deferred benefit scheme, is normally valued at intervals of not more than three years and annual profits are charged with contributions at rates, which based on actuarial valuations, are designed to cover retirement benefits based on projected salaries. At 31 December, 1991, being the date of the most recent actuarial valuation of the fund, the independent consulting actuaries determined that the value of the assets of the fund at that date exceeded the value of the liabilities by E1.1 million. Provision is not made for statutory termination obligations in terms of the Employment Act 1980, which may arise on retirement of employees. It is considered that the company's contributions to the pension fund, which can be recovered against such statutory obligation, will exceed any such liability.

1.7 Investments

Investments are shown at cost. Dividends are brought to account when they are received.
